

ReadyPave^{LTD}
Domestic Brochure

Your paving in safe hands...

Readypave offers you the latest in virtually maintenance free, ultra durable, natural looking driveways and paving to complement every type and size of home.

Andy Read started installing imprinted concrete in the 1980's and formed Readypave in the mid 1990's. We offer a variety of services from patios and paths to driveways and ensure that all work is completed to a high standard meaning our customers are completely satisfied. We cover the North West, North Wales and the Midlands with both domestic and commercial paving and landscaping undertaken.

We do not subcontract any of our work and all of our installations are carried out by our own highly trained, efficient and professional employees who are committed to a high level of customer care. All work is guaranteed and built to last, that's why we're one of the country's leading and most experienced installers of imprinted concrete paving.

When you contact us, we'll visit you to discuss your specific paving requirements, and then work with you to design a paving solution that will flatter your home and create a stunning first impression. Then, at your convenience, we will arrange for our professional installation team to create the driveway/patio of your dreams - resulting in a surface with a lasting strength, a pristine appearance that will never fade, and that requires the absolute minimum of maintenance.

Natural-looking and virtually maintenance free...

Readypave imprinted concrete comes in a multitude of colours, textures and styles, all with a reassuringly natural look. We have obtained full health and safety requirements, use only quality assured materials and hold all necessary insurance policies. Combined with a conscientious and highly experienced workforce the company forms a recipe for successful projects time and time again. From cobble brick to cut stone styles and even timber decking, our imprinted concrete driveways may appear authentic, but their performance reaches far beyond those of traditional methods.

Complete customer satisfaction...

Ready Pave Benefits

- Installations that are virtually maintenance free, with no weeds, moss, oil stains or algae growth
- Modern UVA stable pigments ensuring colours do not fade, in conjunction with a surface hardener to maximise wear resistance
- A non slip polymer coating and a sealed surface with either a matt or gloss finish
- A robust and durable combination of products – an incredible 25% stronger than concrete itself, designed to last a lifetime
- Imprinted concrete comes in a multitude of colours, textures and styles, all with a reassuringly natural look
- Heavy duty, non-slip finish available for steep or sloping driveways

Testimonials

"We are extremely pleased with our new driveway and I would like to thank all those involved, I have never seen people work so hard! If anyone asks we will be sure to recommend you." Mrs Martin, Cheshire

"I am very pleased with the result of our driveway, your crews worked very hard to achieve such a quality finish. I will be more than happy to recommend your company for such work. Many thanks for the excellent job." Mr Upton, Shropshire

"What a transformation! The drive now looks superb. Carried out in a friendly and professional manner." Mrs Walker, Cheshire

If you would like to see current Readypave installations we can provide you with examples or our work in your area or why not visit our show areas at:

Bridgemere Garden World, Near Nantwich, Cheshire. (The largest display area at the UK's largest Garden Centre)
